PROFESSIONAL SUMMARY

Computer Science Engineering student at VIT Bhopal University with a CGPA of 8.49, focused on Data Analytics, Website Development, and Artificial Intelligence. Hands-on experience in building data-driven dashboards, analytical applications, AI-powered web platforms, and interactive user interfaces. Proficient in Python, data processing, visualization, databases, JavaScript, and modern web technologies, with practical experience developing and deploying complete projects. Strong problem-solving and analytical skills with an interest in applying technology to build practical, user-focused solutions.

EDUCATION

VIT Bhopal University	Expected 2028
B.Tech in Computer Science and Engineering Minor in Gaming Technology	CGPA: 8.49/10
Vardhman Higher Secondary School	Class XII
Percentage: 75.2%	
Sanskar Vidhyapeeth School	Class X
Percentage: 69.6%	

TECHNICAL SKILLS

Programming: Python, C++, C, Java, JavaScript

Data Analytics: Pandas, NumPy, Data Cleaning, Exploratory Data Analysis, Statistical Analysis, Data Visualization

Visualization: Matplotlib, Plotly, Streamlit, Folium

Website Development: HTML5, CSS3, JavaScript, Responsive Web Design

Database: MySQL, SQLite, Firebase Firestore

AI & Machine Learning: Machine Learning Fundamentals, Local Machine Learning, AI API Integration, PDF Processing

Tools & Platforms: Git, GitHub, VS Code, Cursor, Firebase, MATLAB

Cloud: AWS Cloud Fundamentals, Firebase Hosting

PROJECTS

TrafficIQ – Intelligent Traffic & Accident Analytics Platform [GitHub](#)

- Built a local-first data analytics platform for exploring traffic conditions, accident patterns, geographic hotspots, and model-estimated risk scenarios using synthetic demonstration data.
- Developed a seven-page Streamlit dashboard with interactive filters, KPIs, Plotly visualizations, traffic and accident analytics, and data-driven insights.
- Implemented geographic hotspot detection using Haversine distance and DBSCAN, with interactive Folium maps for accident locations and hotspot visualization.
- Developed a local logistic-regression model with a what-if simulator for comparing traffic conditions and generating model-based risk insights.
- Tech Stack:** Python, Pandas, NumPy, SQLite, Streamlit, Plotly, Folium, Machine Learning

AI Study Buddy – AI-Powered Study Assistant [GitHub](#)

- Developed a responsive web-based study platform that converts text-based PDFs into summaries, AI-powered Q&A, quizzes, flashcards, and personalized learning content.
- Implemented Firebase Email/Password Authentication and Firestore for user profiles, study-material metadata, quiz scores, and flashcard progress.
- Built an Express.js backend for PDF processing, authenticated AI requests, and secure server-side API integration.
- Designed responsive landing, authentication, and study dashboard interfaces with browser-based learning history and progress tracking.
- Tech Stack:** HTML, CSS, JavaScript, Node.js, Express.js, Firebase, Firestore, OpenAI API, PDF Processing

CERTIFICATIONS

- Introduction to Internet of Things – NPTEL
- Making Your First Virtual reality Game – Coursera
- ServiceNow Administration
- MATLAB Certification
- VITYarthi Certification

LEADERSHIP & ACTIVITIES

General Secretary – Linpack Club, VIT Bhopal

- Managed club communications, interviews, public relations, and event-related activities.

Event Management Team – Vitronix Club, VIT Bhopal

- Contributed to planning, coordination, and execution of club events and student activities.
